Zero to Hero in Python

About Me

A self taught programmer with soft spot for music and sports. In the midst of a career change, I have found myself addicted to writing and learning to write high quality software each day. Not only does programming challenge me mentally, but its given me a sense of purpose and excitement each step of the way.

Experience

FeelGood App

This app was created using Python and the Kivy framework for the user interface. It designed for the user to express their current emotion and the app will give them an inspiring quote!

[FeelGood App >](#)

Blackjack app

This app was made with only Python, using for loops and object oriented programming. Implementing the same rules as if it was an online casino.

[Blackjack App >](#)

Blog Website

Using Python and its web framework Django, this project was a blog style website with backend functions like a built in translator.
